Subject- Motivation Letter for Postdoctoral Programme

Dear Sir/Ma'am,

With my this motivation letter I want to extend my appreciation for Postdoctoral programme at the Boston University. I'm willing to undertake the programme as the next step after my P.hd programme. I finished my p.hd this year in the domain of science and space along with my enormous research experience in the field. I certainly want to get ahead with my research and therefore I want to enrol for the postdocs.

During the course of my p.hd programme, I have worked as an assistant professor. I have executed numbers of projects in the domain as are mentioned in my resume. I'm having an enormous amount of experience and research in the domain of space science. I have a strong urge to join Nasa after finishing up the postdoctoral programme.

I'm looking forward to getting deeper in the field and learning everything possible to my knowledge. I believe my research and strong academics could be of utmost contribution in the space science domain. At last, I'm ending my motivation letter with the utmost hope and ambitions to join the University shortly. I'm looking forward to spreading the glory of the University further by my worthwhile research and education.

Thanks & Regards
Ava Tatum
