Dear Ms. Lodi,

I am writing regarding my application to Great Academy High School. I wanted to express my excitement about the opportunity to attend your school. Your academic programs and university preparation will leave me prepared to seek my dreams of becoming a physician.

As you will see from my academic record, I have worked very hard to prepare for this opportunity. In addition to maintaining good grades in a difficult courses, I have participated in several programs outside of school. I hvae participated in several debate competitions, placing third in two and my team and I recently won our second competition.

However, my record is not entirely academic. I am on a local soccer team, competing most weekends with an impressive record. I also volunteer a local food bank where I have been able to help raise donations and provide food for several local families. It's an exciting opportunity to give back to my community and help other succeed.

I have been able to help my classmates too. I have helped tutor several classmates in math, one of my favorite subjects. I've been able to help them increase their grades in math while also making new friends.

I love learning and helping others. I look forward to being able to continue these activites while at Great Academy High School. Your school's academic program and record of university placement will help me achieve my dream of becoming a physician where I can continue to learn and help others. Please feel free to contact me with any questions.

Thank you,
Amil Ramakrishnan
